

**Microbiology**

8 November 2018

Dear honoured guest

**STAKEHOLDER MEETING AND WORLD ANTIBIOTIC AWARENESS WEEK**

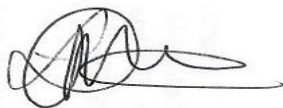

The Microbiology subject group (Aquatic Microbiology Research Group), will be hosting a Stakeholder meeting and public lectures on 14 November 2018 to discuss antibiotic resistance, causes and potential interventions. These events form part of a Water Research Commission project (K5/2585//3) and coincide with the World Antibiotic Awareness Week (WAAW).

I am pleased to invite you to both events as a participant. The aim of the workshop, public lectures and the WAAW is to raise awareness about the importance of antibiotics as well as to encourage best practices among the general public, health workers and policy makers in order to avoid the further emergence and spread of antibiotic resistance.

The themes of the day are: **Antibiotics, antibiotic resistant bacteria, antibiotic resistance genes: Implications in the medical field, veterinary medicine, agriculture and the environment** as well as **Antibiotic Stewardship**.

I look forward to your positive response. To RSVP kindly click the QR code (s) on the attached pdf document. Should you require any additional information, you can contact me on [lesego.molaletom@nwu.ac.za](mailto:lesego.molaletom@nwu.ac.za).

Yours sincerely,

**L. Molale-Tom (PhD)**
