

Graduate Programme 2019 South Africa

POSITION : **GRADUATE: MINE SURVEYOR**
DEPARTMENT : **MINE DEVELOPMENT**
BUSINESS UNIT : **RICHARDS BAY MINERALS**

1 X Position

New challenges demand new ideas. As experts in mining and metals we're looking for the next generation of challengers, visionaries and pioneers. The people who will think beyond possibility to deliver ideas and answers that are essential to human progress.

Located in the KwaZulu Natal province, Richards Bay Minerals (RBM) is part of the Rio Tinto Group and is an internationally recognised sand mining and mineral processing operations leader and one of the world's foremost producers of titanium minerals, high purity pig iron and zircon. We have implemented a sound corporate social development programme and an internationally recognised environmental rehabilitation programme to restore the mined dunes to their natural state once mining operations have ceased. At Rio Tinto you can explore and develop your personal and professional potential within one of the most dynamic and diverse companies in the world.

If you are a high calibre student looking for an opportunity as soon as you graduate; or are you already holding that treasured degree in your hand with less than 2 years working experience, we can offer you one of the widest and most exciting range of opportunities available.

Our exclusive graduate platform provides you the opportunity to work for a business that's making a meaningful difference in the way we resource the world; whilst developing the skills of future expert leaders; and creating a legacy that will improve the lives of millions of people globally.

So if you think you've got what it takes to join a global leader in the mining and metals sector, apply today for an exciting tomorrow.

Applications are now open for those pursuing a career in Mine Surveying.
