

This is what industry has to say about Business Mathematics and Informatics® (BMI) students:

"My experience of BMI graduates is that they compare favourably with the best graduates that we employ from Universities in the UK."

Ian Wilson

Head of Wholesale Credit Risk Measurement: Group Risk, Barclays, London

"I believe that this program has bridged a significant gap between very theoretical research and business reality. The success of candidates in getting jobs with the institutions with whom they have done their research projects clearly indicates how institutions value the project output but just as importantly that they know that they are employing individuals who can add value from day one."

David Hodnett

Deputy CEO: Barclays Africa Group

"The Centre for BMI hits the sweet spot between academic excellence and practical business skills. Due to this mix we find that BMI graduates are not only bright but hit the ground running with practical business skills."

In short industry enjoy excellent productivity from day one and BMI graduates an accelerated career path."

Pravin Burra

(FASSA) Director Capital Markets: Deloitte & Touche

"SAS Institute believes that the world leading programmes at BMI deliver superior professionals to our customers. The core of this success is found in the quality of their students, teaching and leadership."

Murray de Villiers

General Manager: Middle East & Africa Regional Academic Program
